Supervisor

April 30, 2020

To Whom It May Concern:

The Bridgeport Gateway Green Infrastructure Enhancement Project is a stormwater utility project that will provide new drainage facilities in the form of roadside landscape improvements (known as "bio swales"), traffic calming, and improved safety and accessibility to Town residents in the Hamlet of Bridgeport.

Construction for the project will begin work in mid to late May and continue for approximately six weeks. This project will incorporate new bio-swales along adjacent to the Library on North Road and along NYS Route 31 between the North Road intersection and entrance to Pointe Place Casino. As part of the construction of the bio-swales, new underdrains will need to extend under the portion of the driveway that is within the State Right-of-Way (where your driveway meets the roadway). Any portion of a driveway that is impacted by the project will be completely replaced with new subbase and asphalt to match the existing driveway on your property, at no cost to you. All work that takes place as part of this project is being paid for with a grant from the New York State Environmental Facilities Corporation (NYSEFC).

Should you have any questions, please do not hesitate to contact my office at 1-315-687-9190.

Sincerely,

TOWN OF SULLIVAN

John Becker
